

SKEMA's Executive Education programme up 18 places, ranks 61st in latest Financial Times rankings

SKEMA Suzhou, China – one of the school's international campuses that offers customised executive education programmes.

The Financial Times has released its list of [executive education rankings of 2019 for customised programmes](#).

SKEMA Business School's executive education programmes made a remarkable progress and gained 18 places, positioning 61st. This is the third highest increase worldwide in this edition's rankings and the highest for a French school.

This exceptional performance is the result of SKEMA's strong focus on the development of customised programmes for executive education and the global presence of the school through its campuses in Brazil, China, France, the US, and soon, South Africa (Cape Town).

Programmes such as Executive Programme in Management (EPM), offered in partnership with French Chambers of Commerce Abroad and Advanced Human Resources Management Programmes (AHRMP) for GHR-Lib in China, have consolidated the range of customised programmes already deployed with large companies like Saint-Gobain, Oracle and BPI France.

“With novel assets such as the GLOBAL LAB in Augmented Intelligence launched last January, the new e-learning ‘SKOOL - SKEMA Open Online Learning’ platform, and the recruitment of nearly 20 international teachers in 2019, SKEMA intends to continue the development of these programmes in partnership with major global companies. It is now being recognised as a global school with French roots and not merely as a French school abroad,” said **Alice Guilhon, SKEMA's dean**.

“Accompanying the development of talent wherever they are and facilitating transformation in a changing world are our priorities,” added **Pascale Viala, director of the corporate office of SKEMA.**

About SKEMA Business School:

With 8,500 students and 42,000 graduates, SKEMA Business School is a global school that uses its research, teaching programmes, and its well-equipped campuses to train and educate the talents required by companies in the 21st century. The school is now present in 6 locations. It has three campuses in France (Lille, Sophia Antipolis and Paris), one in China (Suzhou), one in the USA (Raleigh), one in Brazil (Belo Horizonte), and one in South Africa (Cape Town). In December 2018, the school announced the creation of a research laboratory named SKEMA GLOBAL LAB in Augmented Intelligence based in the USA and France. SKEMA holds triple EQUIS, AACSB and AMBA accreditation. For more information, visit www.skema.edu. Follow us on Twitter: @SKEMA_BS
